Relevant Experience

Full-Stack Developer @ Applite

September 2019 - June 2020 // Casablanca

I had the opportunity to work on two separate projects as part of this experience :

▸ Project 1: Creation of a web app for online order taking.

- Rebuilt Front-end (Catalogue, Order Pages)
- Developed Back-end part (SMS verification, Cart customization)
- Creation of Database.

▸ Technologies used : PHP, Laravel, HTML / CSS / JS, jQuery and MySQL.

→ [View Webapp](#) ➡ [lalivraison.ma](#)

▸ Project 2: Creation of a Backoffice that manages accounts and which touches database of another Backoffice.

- Creation of Front-end using (Material UI, Core UI)
- Creation of RESTful API that communicate with interfaces and SQL database.
- Testing endpoints using Mocha and Chai.

▸ Technologies used : React, JavaScript, Node.js, Express.js and Socket.IO.
